

CoolSys Natural Refrigeration Solutions

Helping Food Manufacturers and Distributors Transition to Natural Refrigerant with Confidence

In the competitive world of Food and Beverages Manufacturing and Distribution, implementing a cost-effective shift to natural refrigerant is essential.

CoolSys' comprehensive solution, which includes strategic planning, end-to-end program management, engineering and design, securing equipment, installation, start-up, commissioning, and ongoing system maintenance, is a game changer.

CoolSys ensures your customized solution is deployed on time and budget, saving you time, reducing costs, and significantly lowering emissions.

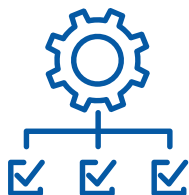

CoolSys' Natural Refrigeration Solution Delivers:

Everything You Need, Nothing You Don't

CoolSys' Engineers, Regulations, and Equipment Experts will help you craft a strategic plan customized to your operations. They will help you identify the facilities to convert to mid-level GWP as intermediary step and which to convert to ultra-low GWP refrigerant, as well as identify the exact OEM configuration for each facility.

Seamless Program Management

CoolSys' Program Managers coordinate with your Plant Managers, General Contractors, each specialized trade Representative, local and state Regulators, OEMs, Equipment Distributors, and CoolSys' installation and recycling teams to minimize delays and change orders, delivering complete visibility at every stage of your projects.

An Expert Partner, Every Step Of The Way

With over 250 CO2 systems installed, including three of the largest transcritical CO2 installations in the US, and more than 1,000 maintained, our proven track record speaks volumes. We specialize in the design, installation, maintenance, and optimization of natural refrigeration systems, ensuring that your new systems operate as intended while delivering the forecasted environmental and financial benefits.

National Coverage, Local Presence

- CoolSys' 450+ team of highly experienced CO2 technicians are strategically positioned throughout the U.S. to support your entire operation.
- Additionally, CoolSys is dedicated to training at least 75 more technicians a year through our renowned CO2 and advanced CO2 training curriculum offered at one of our three state-of-the-art training facilities, ensuring the highest standards in the industry.

- Stay Ahead Of State And Federal Regulations
- Design And Deploy A Natural Refrigeration Conversion Plan That Makes Sense For Your Operations
- Reduce Your Stores Conversion, Remodel and New Construction Costs
- Dramatically Lower Your Refrigeration Operation Carbon Footprint
- Accelerate Your Path To NetZero
- Reduce Your Operating Costs

Transitioning to Natural Refrigeration Takes Time, Start Today

Make the transition to natural refrigerants seamlessly with CoolSys. Trust the industry leader with the expertise and commitment to help your stores thrive sustainably.
